**TOWN OF NAVASSA
PHASE II STORMWATER ORDINANCE**

Article I. General Provisions

- Sec. 1-1. Title.
- Sec. 1-2. Authority.
- Sec. 1-3. Findings.
- Sec. 1-4. Purpose.
- Sec. 1-5. Applicability and jurisdiction.
- Sec. 1-6. Interpretation.
- Sec. 1-7. Design Manuals.
- Sec. 1-8. Relationship to other laws, regulations and private agreements.
- Sec. 1-9. Severability.
- Sec. 1-10. Effective date and transitional provisions.
- Sec. 1-11 Terms Defined
- Secs. 1-12.--1-20. Reserved.

Article II. Administration and Procedures

- Sec. 1-21. Review and decision-making entities.
- Sec. 1-22. Review procedures.
- Sec. 1-23. Applications for approval.
- Sec. 1-24. Approvals.
- Sec. 1-25. Appeals.
- Secs. 1-26.--1-35. Reserved.

Article III. Standards

- Sec. 1-36. General standards.
- Sec. 1-37. Development standards for low-density projects.
- Sec. 1-38. Development standards for high-density projects.
- Sec. 1-39. Reserved.
- Sec. 1-40. Standards for stormwater control measures.
- Sec. 1-41. Reserved.
- Sec. 1-42. Variances.
- Secs. 1-43. Pet Waste
- Secs. 1-44--1-53. Reserved

Article IV. Maintenance

- Sec. 1-54. General standards for maintenance.
- Sec. 1-55. Operation and maintenance agreement.
- Sec. 1-56. Inspection program.
- Sec. 1-57. Performance security for installation.
- Sec. 1-58. Notice to owners.
- Sec. 1-59. Records of installation and maintenance activities.
- Sec. 1-60. Nuisance.
- Sec. 1-61. Maintenance easement.
- Secs. 1-62.--1-71. Reserved.

Article V. Enforcement and Violations

- Sec. 1-72. General.
- Sec. 1-73. Remedies and penalties.
- Sec. 1-74. Procedures.
- Secs. 1-75.--1-84. Reserved.

Article VI. Reserved

- Secs. 1-85.--1-95. Reserved.

Article VII. Illicit Discharges

- Sec. 1-96. Illicit discharges and connections.
- Secs. 1-97.--1-106. Reserved.

ARTICLE I. GENERAL PROVISIONS

Sec. 1-1. Title.

This ordinance shall be officially known as "The Phase II Stormwater Ordinance." It is referred to herein as "this ordinance."

Sec. 1-2. Authority.

The Town of Navassa is authorized to adopt this ordinance pursuant to North Carolina law, including but not limited to Article 14, Section 5 of the Constitution of North Carolina; the North Carolina General Statutes 143-214.7 and rules promulgated by the Environmental Management Commission there under; Session Law 2004-163; G.S. 160A, 160A-174, 160A-185; as well as G.S. Chapter 113A, Article 4 (Sedimentation Pollution Control); Article 21, Part 6 (Floodway Regulation); G.S. Chapter 160A, Article 19 (Planning and Regulation of Development); G.S. Chapter 153A, Article 18.

Sec. 1-3. Findings.

It is hereby determined that:

Increased impervious areas and other site features of development and redevelopment alter the hydrologic response of local watersheds and increase stormwater runoff rates and volumes, flooding, soil erosion, stream channel erosion, non-point and point source pollution, and sediment transport and deposition, as well as reduce groundwater recharge;

These changes in stormwater runoff may contribute to increased quantities of water-borne pollutants and to altered hydrology that are harmful to public health and safety and the natural environment; and

These effects can be managed and minimized by applying proper design and well-planned controls to manage stormwater runoff from development sites.

Further, the Federal Water Pollution Control Act of 1972 ("Clean Water Act") and federal Phase II Stormwater Rules promulgated under it, as well as rules of the North Carolina Environmental Management Commission promulgated in response to Federal Phase II requirements, compel certain urbanized areas, including this jurisdiction, to adopt stormwater controls such as those included in this ordinance.

Therefore, the Town of Navassa establishes this set of water quality and quantity regulations to meet the requirements of state and federal law regarding control of stormwater runoff and discharge.

Sec. 1-4. Purpose.

(A) General. The purpose of this ordinance is to protect, maintain and enhance the public health, safety, environment, and general welfare by establishing minimum requirements and procedures to control the adverse effects of increased post-development stormwater runoff and nonpoint and point source pollution associated with new development and redevelopment (as well as illicit discharges into municipal stormwater systems). It has been determined that proper management of construction-related and post-development stormwater runoff will minimize damage to public and private property and infrastructure; safeguard the public health, safety, and general welfare; and protect water and aquatic resources.

(B) Specific. This ordinance seeks to meet its general purpose through the following specific objectives and means:

- (1)** Establishing decision-making processes for new development and redevelopment that protect the integrity of watersheds and preserve the health of water resources;
- (2)** Requiring that new development and redevelopment:
 - a.** Maintain the pre-development hydrologic response in their post-development state as nearly as practicable for the applicable design storm;
 - b.** Reduce flooding, stream bank erosion, nonpoint and point source pollution and increases in stream temperature; and,
 - c.** Maintain the integrity of stream channels and aquatic habitats;
- (3)** Establishing stormwater management standards and design criteria to regulate and control post-development stormwater runoff quantity and quality;
- (4)** Establishing design and review criteria for the construction, function, and use of structural stormwater BMPs that may be used to meet the post-development stormwater management standards;
- (5)** Encouraging the use of better management and site design practices, such as the use of vegetated conveyances for stormwater and the preservation of green space, riparian buffers and other conservation areas to the maximum extent practicable;
- (6)** Establishing provisions for long-term responsibility for and maintenance of structural and nonstructural stormwater BMPs to ensure that they continue to function as designed, are maintained appropriately, and pose no threat to public safety;
- (7)** Establishing administrative procedures:
 - a.** For the submission, review, approval and disapproval of stormwater management plans;

- b. For the inspection of approved projects; and,
 - c. To assure appropriate long-term maintenance;
- (8) Controlling illicit discharges into the municipal separate stormwater system; and,
 - (9) Controlling erosion and sedimentation from construction activities.
 - (10) Coordinate site design plans that include open space and natural areas with the intent and policies of the town's ordinances and adopted plans, including but not limited to the town's CAMA Land Use Plan.

Sec. 1-5. Applicability and Jurisdiction.

(A) General. Beginning with and subsequent to its effective date, this ordinance shall be applicable to all development and redevelopment, including but not limited to, site plan applications and subdivision applications that meet any of the following criteria, unless exempt pursuant to Subsection (B) Exemptions of this section:

- (1) All development and redevelopment in which the total land disturbance is one acre or more;
- (2) All non-residential development or redevelopment that will add 10,000 square feet or more of built upon area irrespective of the condition of the existing surface upon which the impervious surface area is created;
- (3) All development or redevelopment in which the total land disturbance is less than one acre and does not add 10,000 square feet or more of built upon area if such activities are part of a larger common plan of development or sale, even though multiple, separate or distinct activities take place at different times or different schedules;
- (4) All development or redevelopment that requires a CAMA major permit or a Sedimentation/Erosion Control Plan.

(B) Exemptions. The following are exempt from the provisions of this ordinance:

- (1) Development and redevelopment that cumulatively disturbs less than one (1) acre, does not add 10,000 square feet or more of built upon area and is not part of a larger common plan of development or sale;
- (2) Activities that are exempt from permit requirements of Section 404 of the federal Clean Water Act as specified in 40 CFR 232 (primarily, ongoing farming and forestry activities) are exempt from the provisions of this ordinance.

- (3) The installation, repair, replacement or maintenance of subsurface utilities by public or private utility operators.

(C) *No Development or Redevelopment Until Compliance and Permit.* No land disturbing activity including development or redevelopment shall occur except in compliance with the provisions of this ordinance or unless exempted. No development for which a permit is required pursuant to this ordinance shall occur except in compliance with the provisions, conditions, and limitations of the permit.

(D) *Map.* The provisions of this ordinance shall apply within the areas designated on the map titled “Phase II Stormwater Map of Town of Navassa, North Carolina” (“the Stormwater Map”), which is adopted simultaneously herewith. The Stormwater Map and all explanatory matter contained thereon accompanies and is hereby made a part of this ordinance.

The Stormwater Map shall be kept on file by the Stormwater Administrator and shall be updated to take into account changes in the land area covered by this ordinance and the geographic location of all structural BMPs permitted under this ordinance. In the event of a dispute, the applicability of this ordinance to a particular area of land or BMP shall be determined by reference to the North Carolina Statutes, the North Carolina Administrative Code, and local zoning and jurisdictional boundary ordinances.

Sec. 1-6. Interpretation.

(A) *Meaning and Intent.* All provisions, terms, phrases, and expressions contained in this ordinance shall be construed according to the general and specific purposes set forth in Sec. 1-4., Purpose. If a different or more specific meaning is given for a term defined elsewhere in the Town of Navassa Code of Ordinances, the meaning and application of the term in this ordinance shall control for purposes of application of this ordinance.

(B) *Text Controls in Event of Conflict.* In the event of a conflict or inconsistency between the text of this ordinance and any heading, caption, figure, illustration, table, or map, the text shall control.

(C) *Authority for Interpretation.* The Stormwater Administrator has authority to determine the interpretation of this ordinance. Any person may request an interpretation by submitting a written request to the Stormwater Administrator, who shall respond in writing within thirty (30) days. The Stormwater Administrator shall keep on file a record of all written interpretations of this ordinance and shall keep the file with the official version of this ordinance to be located in the Town Clerk’s office and made available to the public.

(D) *References to Statutes, Regulations, and Documents.* Whenever reference is made to a resolution, ordinance, statute, regulation, manual (including the Design Manuals), or document, it shall be construed as a reference to the most recent edition of such that has been finalized and published with due provision for notice and comment, unless otherwise specifically stated.

(E) *Computation of Time.* The time in which an act is to be done shall be computed by excluding the first day and including the last day. If a deadline or required date of action falls on a Saturday, Sunday, or holiday observed by the Town of Navassa, the deadline or required date of action shall be the next day that is not a Saturday, Sunday or holiday observed by the Town of Navassa. References to days are calendar days unless otherwise stated.

(F) *Delegation of Authority.* Any act authorized by this Ordinance to be carried out by the Stormwater Administrator of the Town of Navassa may be carried out by his or her designee.

(G) *Usage.*

- (1)** The words "shall", "must", and "will" are mandatory in nature, establishing an obligation or duty to comply with the particular provision. The words "may" and "should" are permissive in nature.
- (2)** Unless the context clearly indicates the contrary, conjunctions shall be interpreted as follows: The word "and" indicates that all connected items, conditions, provisions and events apply. The word "or" indicates that one or more of the connected items, conditions, provisions or events apply.
- (3)** Words used in the present tense include the future tense. Words used in the singular number include the plural number and the plural number includes the singular number, unless the context of the particular usage clearly indicates otherwise. Words used in the masculine gender include the feminine gender, and vice versa.

(H) *Measurement and Computation.* Lot area refers to the amount of horizontal land area contained inside the lot lines of a lot or site.

(I) *Minimum Requirements.* The requirements contained in this Ordinance shall be the minimum requirements for administration, enforcement, procedures, restrictions, standards, uses, variances, and all other areas addressed by this Ordinance; and, if any other existing ordinance or regulation allows lesser regulation, this Ordinance shall govern, so that in all cases, the more restrictive limitation or requirement shall govern.

Sec. 1-7. Design Manuals.

(A) *Reference to Design Manuals.* The Stormwater Administrator shall use the policy, criteria, and information, including technical specifications and standards, in the most recent version of the North Carolina Division of Water Quality Stormwater Best Management Practices Design Manual or the Brunswick County, North Carolina Low Impact Development (LID) Guidance Manual (Collectively the Design Manuals) as the basis for decisions about stormwater permits and about the design, implementation and performance of structural and non-structural stormwater BMPs. However, when there is a conflict between the North Carolina Division of

Water Quality Stormwater Best Management Practices Design Manual and the Brunswick County, North Carolina Low Impact Development (LID) Guidance Manual, the more stringent standards shall apply.

The Design Manuals includes a list of acceptable stormwater treatment practices, including specific design criteria for each stormwater practice. Stormwater treatment practices that are designed, constructed, and maintained in accordance with these design and sizing criteria shall be presumed to meet the water quality performance standards of the Phase II laws and this ordinance.

(B) *Relationship of Design Manuals to Other Laws and Regulations.* If the specifications or guidelines of the Design Manuals are more restrictive or apply a higher standard than other laws or regulations, that fact shall not prevent application of the specifications or guidelines in the Design Manuals.

(C) *Changes to Standards and Specifications.* If the standards, specifications, guidelines, policies, criteria, or other information in the Design Manuals are amended subsequent to the submittal of a complete application for approval pursuant to this ordinance but prior to approval, the standards, specifications, guidelines, policies, criteria, or other information in the Design Manuals that existed at the time of application shall apply

Sec. 1-8. Relationship to Other Laws, Regulations and Private Agreements.

(A) *Conflict of Laws.* This ordinance is not intended to modify or repeal any other ordinance, rule, regulation or other provision of law. The requirements of this ordinance are in addition to the requirements of any other ordinance, rule, regulation or other provision of law. Where any provision of this ordinance imposes restrictions different from those imposed by any other ordinance, rule, regulation or other provision of law, whichever provision is more restrictive or imposes higher protective standards for human or environmental health, safety, and welfare shall control.

(B) *Private Agreements.* This ordinance is not intended to revoke or repeal any easement, covenant, or other private agreement. However, where the regulations of this ordinance are more restrictive or impose higher standards or requirements than such an easement, covenant, or other private agreement, the requirements of this ordinance shall govern. Nothing in this ordinance shall modify or repeal any private covenant or deed restriction, but such covenant or restriction shall not legitimize any failure to comply with this ordinance. In no case shall the Town of Navassa be obligated to enforce the provisions of any easements, covenants, or agreements between private parties.

Sec. 1-9. Severability.

If the provisions of any section, subsection, paragraph, subdivision or clause of this ordinance shall be adjudged invalid by a court of competent jurisdiction, such judgment shall not

affect or invalidate the remainder of any section, subsection, paragraph, subdivision or clause of this ordinance.

Sec. 1-10. Effective Date and Transitional Provisions.

(A) *Effective Date.* This Ordinance shall take effect on December 16, 2010.

(B) *Final Approvals, Complete Applications.* All development and redevelopment projects for which complete and full applications and plans were submitted and approved by the Town of Navassa prior to the effective date of this ordinance and which remain valid, unexpired, unrevoked and not otherwise terminated at the time of development or redevelopment shall be exempt from complying with all provisions of this ordinance dealing with the control or management of post-construction runoff, but shall be required to comply with all other applicable provisions, including but not limited to illicit discharge provisions.

A phased development plan shall be deemed approved prior to the effective date of this ordinance if it has been approved by all necessary government units, it remains valid, unexpired, unrevoked and not otherwise terminated, and it shows:

- (1) For the initial or first phase of development, the type and intensity of use for a specific parcel or parcels, including at a minimum, the boundaries of the project and a subdivision plan that has been approved.
- (2) For any subsequent phase of development, sufficient detail so that proper review and installation of the stormwater BMPs is assured.

(C) *Violations Continue.* Any violation of provisions existing on the effective date of this ordinance shall continue to be a violation under this ordinance and be subject to penalties and enforcement under this ordinance unless the use, development, construction, or other activity complies with the provisions of this ordinance.

Sec. 1-11. Terms defined.

When used in this Ordinance, the following words and terms shall have the meaning set forth in this Article, unless other provisions of this ordinance specifically indicate otherwise.

The definitions set out in 15A NCAC 02H .1002 (Definitions), G.S. 143-212, and G.S. 143-213 shall be used when not in conflict with the definitions set out specifically in this ordinance.

Built-upon area (BUA) means that portion of a development project that is covered by impervious surface including, but not limited to, buildings; pavement and gravel areas such as roads, parking lots, and paths; and recreation facilities such as tennis courts. "Built-upon area" does not include a wooden slatted deck, the water area of a swimming pool, or pervious paving

material to the extent that the paving material absorbs water or allows water to infiltrate through the paving material.

Common plan of development or sale means a project where construction activities may be taking place at different times, but under a single over-arching development plan. This includes but is not limited to a residential development project that involves subdivision of land, installation of utilities, access roads and other common facilities with the intention of selling or developing lots in the subdivision as home sites. A stormwater permit is required to cover all activities under the common plan of development or common phase of development of a Planned Unit Development or Major Subdivision including future home sites such that the stormwater system is capable of managing runoff from the entire project or phase at complete build-out.

Department means the North Carolina Department of Environment and Natural Resources.

Design Manuals means the stormwater design manuals approved for use in Phase II jurisdictions by the Department for the implementation of the requirements of the federal Phase II stormwater program and the Brunswick County, North Carolina Low Impact Development (LID) Guidance Manual. All references herein to the Design Manuals are to the latest published edition or revision. A copy of the Design Manuals may be obtained from the Town of Navassa or downloaded from the North Carolina Division of Water Quality's website or from Brunswick County's website.

Development means any land-disturbing activity that increases the amount of built-upon area or that otherwise decreases the infiltration of precipitation into the soil.

Division means the Division of Water Quality in the Department.

Hazardous Material means any item or agent (biological, chemical, physical) which has the potential to cause harm to humans, animals, or the environment, either by itself or through interaction with other factors.

High-density project means any project that exceeds the low-density threshold for dwelling units per acre or built-upon area.

Low-density project means for a project that is not located within one-half mile of and draining to Shellfish Resource Waters or within 575 feet of the mean high waterline of areas designated as Outstanding Resource Waters: the project is a low-density project if it has no more than twenty-four percent (24%) built-upon area (BUA).

For a project that is located within one-half mile of and draining to Shellfish Resource Waters or is within 575 feet of the mean high waterline of areas designated as Outstanding Resource Waters: the project is a low-density project only if it contains no more than twelve percent (12%) built-upon area.

A project with an overall density at or below the relevant low-density threshold, but containing areas with a density greater than the overall project density, may be considered low density as long as the project meets or exceeds the post-construction model practices for low-density projects and locates the higher density in upland areas and away from surface waters and drainageways to the maximum extent practicable.

Non-erosive velocity means a rate of flow of stormwater runoff, measured in feet per second, which does not erode soils. Non-erosive velocities vary for individual sites, taking into account topography, soil type, and runoff rates.

One-year, 24-hour storm means the surface runoff resulting from a 24-hour rainfall of an intensity expected to be equaled or exceeded, on average, once in 12 months and with a duration of 24 hours.

Owner means the legal or beneficial owner of land, including but not limited to a mortgagee or vendee in possession, receiver, executor, trustee, or long-term or commercial lessee, or any other person or entity holding proprietary rights in the property or having legal power of management and control of the property. "Owner" shall include long-term commercial tenants; management entities, such as those charged with or engaged in the management of properties for profit; and every person or entity having joint ownership of the property. A secured lender not in possession of the property does not constitute an owner, unless the secured lender is included within the meaning of "owner" under another description in this definition, such as a management entity.

Permeable Pavement means paving material that absorbs water or allows water to infiltrate through the paving material. Permeable pavement materials include porous concrete, permeable interlocking concrete pavers, concrete grid pavers, porous asphalt, and any other material with similar characteristics. Compacted gravel shall not be considered permeable pavement.

Redevelopment means any development on previously-developed land, other than a rebuilding activity that results in no net increase in built-upon area and that provides equal or greater stormwater control than the previous development.

Residential development means buildings for residence such as attached and detached single family dwellings, apartment complexes, condominiums, townhouses, cottages, and their associated outbuildings such as garages, storage buildings, and gazebos.

Shellfish Resource Waters means Class SA waters that contain an average concentration of 500 parts per million of natural chloride ion. Average concentration is determined by averaging the chloride concentrations of five (5) water samples taken one-half mile downstream from the project site that are taken on separate days, within one (1) hour of high tide, and not within forty-eight (48) hours following a rain event. The chloride ion concentrations are to be determined by a State-certified laboratory.

Structural BMP means a physical device designed to trap, settle out, or filter pollutants from stormwater runoff; to alter or reduce stormwater runoff velocity, amount, timing, or other characteristics; to approximate the pre-development hydrology on a developed site; or to achieve any combination of these goals. Structural BMP includes physical practices such as constructed wetlands, vegetative practices, filter strips, grassed swales, and other methods installed or created on real property. "Structural BMP" is synonymous with "structural practice," "stormwater control facility," "stormwater control practice," "stormwater treatment practice," "stormwater management practice," "stormwater control measures," "structural stormwater treatment systems," and similar terms used in this ordinance.

Substantial progress. For the purposes of determining whether sufficient progress has been made on an approved plan, one or more of the following construction activities toward the completion of a site or subdivision plan shall occur: obtaining a sedimentation and erosion control permit and conducting grading activity on a continuous basis and not discontinued for more than forty-five (45) days; or installation and approval of on-site infrastructure; or obtaining a building permit for the construction and approval of a building foundation. "Substantial progress" for purposes of determining whether an approved plan is null and void is not necessarily the same as "substantial expenditures" used for determining vested rights pursuant to applicable law.

Vegetative buffer means an area of natural or established vegetation directly adjacent to surface waters through which stormwater runoff flows in a diffuse manner to protect surface waters from degradation due to development activities.

Vegetative conveyance means a permanent, designed waterway lined with vegetation that is used to convey stormwater runoff at a non-erosive velocity within or away from a developed area.

Water Dependent Structures means a structure for which the use requires access or proximity to or sitting within surface waters to fulfill its basic purpose, such as boat ramps, boat houses, docks, and bulkheads. Ancillary facilities such as restaurants, outlets for boat supplies, parking lots and boat storage areas are not water dependent uses.

Secs. 1-12.--1-20. Reserved.

ARTICLE II. ADMINISTRATION AND PROCEDURES

Sec. 1-21. Review and decision-making entities.

(A) *Stormwater Administrator.*

- (1) ***Designation.*** A Stormwater Administrator shall be designated by the Town Administrator of Navassa and shall be responsible for implementing and enforcing this ordinance.
- (2) ***Powers and Duties.*** In addition to the powers and duties that may be conferred by other provisions of the Town of Navassa Code of Ordinances and other laws, the Stormwater Administrator shall have the following powers and duties under this ordinance:
 - a. To review and approve, approve with conditions, or disapprove stormwater management plans pursuant to this ordinance.
 - b. To make determinations and render interpretations of this ordinance.
 - c. To establish permit application requirements and schedules for submittal and review of stormwater management plans, permit applications, and appeals.
 - d. To review and make recommendations to the Town of Navassa Town Council and Planning Board on modification of this ordinance or the process for stormwater management.
 - e. To enforce the provisions of this ordinance in accordance with its enforcement provisions.
 - f. To maintain records, maps, forms and other official materials as relate to the adoption, amendment, enforcement, and administration of this ordinance.
 - g. To provide expertise and technical assistance to the Town Council, Planning Board, Utility Operations Board, and Environmental and Stormwater Advisory Committee upon request.
 - h. To designate appropriate other person(s) to carry out the powers and duties of the Stormwater Administrator.
 - i. To take any other action necessary to administer the provisions of this ordinance.

Sec. 1-22. Review Procedures.

(A) *Permit Required; Must Apply For Permit.* A stormwater management permit (hereafter “permit”) shall be required for all development or redevelopment unless exempt pursuant to this ordinance. A permit may only be issued after properly submitting a stormwater permit application, a stormwater management plan, and the fee for stormwater management permit application review. For phased developments, each phase shall require a separate, stand-alone stormwater permit application unless the original application included sufficient detail to cover subsequent phases and there are no substantial modifications required.

(B) *Effect of Permit.* A stormwater permit shall govern the design, installation, and construction of stormwater management and control practices on the site, including structural BMPs and elements of site design for stormwater management other than structural BMPs.

The permit review process is intended to provide a mechanism for the review, approval, and inspection of the planned approach to be used for the management and control of stormwater for the development or redevelopment site consistent with the requirements of this ordinance, whether the approach consists of structural BMPs or other techniques such as low-impact or low-density design. The permit does not continue in existence indefinitely after the completion of the project; rather, compliance after project construction is assured by the maintenance provisions established in this ordinance. For projects involving the creation of a homeowner’s association, property owner’s association, or similar entity, the operations and maintenance agreement and all of the responsibilities described therein shall be transferred from the developer to the owner’s association upon the proper submittal of the as-built drawings and the final inspection and final approval by the Stormwater Administrator.

(C) *Authority to file applications.* All permit applications required pursuant to this Code shall be submitted to the Stormwater Administrator and shall be written only to one of the following entities:

- (1) The property owner only, or
- (2) Jointly to the property owner and the leasee. In this case, both the leasee and the property owner shall sign Operation and Maintenance agreements. The lease agreement between the parties should indicate that while the leasee occupies the building, the leasee is responsible for complying with the stormwater permit. Once the building is vacated, permit compliance falls back to the landowner.

(D) *Establishment of permit application requirements, schedule and fees.*

- (1) ***Permit application Contents and Form.*** The Stormwater Administrator shall establish requirements for the content and form of all applications and shall amend and update those requirements from time to time. The stormwater permit application shall require in a detailed plan a description of:
 - a. The post-development stormwater runoff control and management;

- b. The design of all stormwater facilities and practices;
 - c. Site identification information;
 - d. Ownership information; and,
 - e. A written narrative explaining how the proposed project shall meet the requirements of this ordinance.
- (2) ***Submission Schedule.*** The Stormwater Administrator shall establish a submission schedule for permit applications. The schedule shall establish deadlines by which complete applications must be submitted for the purpose of ensuring that there is adequate time to review plans and applications, and that the various stages in the review process are accommodated.
- (3) ***Permit Application Review Fees.*** The Town Council of Navassa shall establish permit review fees as well as policies regarding refund of any fees upon withdrawal of an application, and may amend and update the fees and policies from time to time.
- (4) ***Administrative Manual.*** For applications required under this Code, the Stormwater Administrator shall compile the application requirements, submission schedule, fee schedule, a copy of this ordinance, and information on how and where to obtain the Design Manuals in an Administrative Manual, which shall be made available to the public.

(E) *Submittal of Complete Application.* Applications for a stormwater management permit shall be submitted to the Stormwater Administrator pursuant to the application submittal schedule established by the Stormwater Administrator, along with the stormwater management plan and appropriate fee established pursuant to this section. Applicants shall submit two (2) copies of the complete application to the Stormwater Administrator for review.

An application shall be considered as timely submitted only when it contains all elements of a complete application pursuant to this ordinance, along with the appropriate fee. If the Stormwater Administrator finds that an application or stormwater management plan is incomplete, the applicant shall be notified of the deficient elements and shall be provided with an opportunity to submit a complete application. However, the submittal of an incomplete application shall not suffice to meet a deadline contained in the submission schedule established above.

(F) *Review.* Within forty-five (45) working days after a complete application submittal the Stormwater Administrator shall review the application and determine whether the stormwater management plan permit application complies with the standards of this ordinance.

- (1) **Approval.** If the Stormwater Administrator finds that the application complies with the standards of this ordinance, the Stormwater Administrator shall approve the application and issue a stormwater management permit.
- (2) **Approval with Conditions.** The Stormwater Administrator may impose conditions of approval as needed to ensure compliance with this ordinance. The conditions shall be included as part of the approval and included in the issued stormwater permit.
- (3) **Disapproval.** If the Stormwater Administrator finds that the stormwater management plan fails to comply with the standards of this ordinance, the Stormwater Administrator shall notify the applicant and shall indicate how the application or plan fails to comply. The applicant shall have an opportunity to submit a revised application and plan.

(G) Revision and Subsequent Review. Within forty-five (45) working days after a complete revised application submittal, the Stormwater Administrator shall review the revised application and determine whether the stormwater management plan and application complies with the standards of this ordinance, and shall approve, approve with conditions, or disapprove the application.

- (1) **Fee for resubmittal.** One re-submittal of a revised application may be submitted without payment of an additional permit application review fee. Any re-submittal after the first re-submittal shall be accompanied by a permit application review additional fee, as established pursuant to this ordinance.
- (2) **Time limit for resubmittal.** If a revised application is not re-submitted within ninety (90) calendar days from the date the applicant was notified, the application shall be considered withdrawn, and a new submittal for the same or substantially the same project shall be required along with the appropriate fee for a new submittal.

Sec. 1-23. Applications for Approval.

(A) Concept plan and consultation meeting. Before a stormwater management permit application is deemed complete, the Stormwater Administrator or developer may request a consultation on a concept plan for the post-construction stormwater management system to be utilized in the proposed development project. This consultation meeting should take place at the time of the preliminary plan of subdivision or other early step in the development process. The purpose of this meeting is to discuss the post-construction stormwater management measures necessary for the proposed project, as well as to discuss and assess constraints, opportunities and potential approaches to stormwater management designs before formal site design engineering is commenced. The Navassa Subdivision Ordinance and Zoning Ordinance, local watershed plans, other plans and ordinances adopted by the Town of Navassa, and other relevant resource protection plans should be consulted in the discussion of the concept plan. To accomplish this

goal, the following information should be included in the concept plan, which shall be submitted in advance of the meeting:

- (1) ***Existing conditions/proposed site plans.*** Existing conditions and proposed site layout sketch plans, which illustrate: existing and proposed topography; perennial and intermittent streams; mapping of predominant soils from soil surveys (if available); boundaries of existing predominant vegetation; proposed limits of clearing and grading; and location of existing and proposed roads, buildings, parking areas and other impervious surfaces. The Town of Navassa Subdivision Ordinance and Zoning Ordinance should be consulted in order to ensure compliance with the town's development regulations.
- (2) ***Natural resources inventory.*** A written or graphic inventory of natural resources at the site and surrounding area as it exists prior to the commencement of the project. This description should include a discussion of soil conditions, forest cover, geologic features, topography, wetlands, and native vegetative areas on the site, as well as the location and boundaries of other natural feature protection and conservation areas such as lakes, ponds, floodplains, stream buffers and other setbacks (e.g., drinking water well setbacks, septic setbacks, etc.). Particular attention should be paid to environmentally sensitive features that provide opportunities or constraints for development and stormwater management. All applications for development and redevelopment shall adhere to the tree preservation requirements of the Town of Navassa Zoning Ordinance if applicable.
- (3) ***Stormwater management system concept plan.*** A written or graphic concept plan of the proposed post-development stormwater management system including: preliminary selection and location of proposed structural stormwater controls; low-impact design elements; location of existing and proposed conveyance systems such as grass channels, swales, and storm drains; flow paths; location of floodplain/floodway limits; relationship of site to upstream and downstream properties and drainages; and preliminary location of any proposed stream channel modifications, such as bridge or culvert crossings.

(B) *Stormwater management permit application.* The stormwater management permit application shall contain detailed plans on how post-development stormwater runoff shall be controlled and managed and how the proposed project shall meet the requirements of this ordinance, including Article III Standards. All such plans shall be prepared by a registered North Carolina professional engineer, surveyor, soil scientist or landscape architect, and the engineer, surveyor, soil scientist or landscape architect shall perform services only in their area of certification, and shall verify that the design of all stormwater management facilities and practices meets the submittal requirements for complete applications, that the designs and plans are sufficient to comply with applicable standards and policies found in the Design Manuals, and that the designs and plans ensure compliance with this ordinance.

The submittal shall include all of the information required in the submittal checklist established by the Stormwater Administrator. Incomplete submittals shall be treated pursuant to Sec. 1-22.

(C) *As-built drawings and final approval.* Upon completion of a project, and before any certificate of occupancy shall be granted, the applicant shall certify that the completed project is in substantial accordance with the approved stormwater management plans and designs, and shall submit as-built drawings for all stormwater management facilities or practices.

The as-built drawings shall show the final design specifications for all stormwater management facilities and practices and the field location, size, depth, and planted vegetation of all measures, controls, and devices, as installed. The designer of the stormwater management measures and plans shall certify, under seal, that the as-built drawings of the stormwater measures, controls, and devices are in compliance with the approved stormwater management plans and designs and with the requirements of this ordinance. A final inspection and final approval by the Stormwater Administrator shall occur before the release of any performance securities.

For projects involving the creation of a homeowners' association, property owners' association, or similar entity, the operations and maintenance agreement shall be transferred from the developer to the owner's association upon the proper submittal of the as-built drawings and the final inspection and final approval by the Stormwater Administrator. The transference of the operations and maintenance agreement from the developer to the owners' association shall be submitted in writing and approved by the Stormwater Administrator. At such time the operations and maintenance agreement is transferred from the developer to the owners' association the owner's association shall be considered the permittee and shall be responsible for all of the requirements identified in this ordinance including but not limited to: maintenance of the stormwater BMPs, submittal of the annual maintenance and inspection report, proper management of the structural BMP reserve fund, and each requirement of the operations and maintenance agreement.

(D) *Other permits.* No certificate of occupancy shall be issued without final as-built drawings and a final inspection and approval by the Stormwater Administrator, except where multiple units are served by the stormwater practice or facilities, in which case the Town of Navassa may elect to withhold a percentage of permits or certificates of occupancy until as-built drawings are submitted and final inspection and approval has occurred.

Sec. 1-24. Approvals.

(A) *Effect of approval.* Approval authorizes the applicant to go forward with only the specific plans and activities authorized in the permit. The approval shall not be construed to exempt the applicant from obtaining other applicable approvals from local, state, and federal authorities.

(B) Time limit/expiration. An approved plan shall become null and void if the applicant fails to make substantial progress on the site within 18 months after the date of approval. The Stormwater Administrator may grant a single, one-year extension of this time limit, for good cause shown, upon receiving a written request from the applicant before the expiration of the approved plan.

In granting an extension, the Stormwater Administrator may require compliance with standards adopted since the original application was submitted unless there has been substantial reliance on the original permit and the change in standards would infringe the applicant's vested rights.

Sec. 1-25. Appeals.

(A) Right of appeal. Any aggrieved person affected by any decision, order, requirement, or determination relating to the interpretation or application of this ordinance made by the Stormwater Administrator may file an appeal to the Town of Navassa Board of Adjustment within thirty (30) days of the decision, order, requirement or determination.

(B) Filing of appeal and procedures. An appeal shall be taken within thirty (30) days of the Stormwater Administrator's decision by filing a notice of appeal and specifying the grounds for appeal on forms provided by the Town of Navassa. The Stormwater Administrator shall transmit to the Town of Navassa Board of Adjustment all documents constituting the record on which the decision appealed from was taken.

The hearing conducted by the Town of Navassa Board of Adjustment shall be conducted in the nature of a quasi-judicial proceeding with all findings of fact supported by competent, material evidence.

(C) Review by Superior Court. Every decision of the Town of Navassa Board of Adjustment shall be subject to Superior Court review by proceedings in the nature of certiorari. Petition for review by the Superior Court shall be filed with the Clerk of Superior Court within thirty (30) days after the latter of the following:

- (1) The decision of the Town of Navassa Board of Adjustment is filed; or
- (2) A written copy of the decision is delivered to every aggrieved party who has filed a written request for such copy with the Chair of the Town of Navassa Board of Adjustment at the time of its hearing of the case.

Secs. 1-26.--1-35. Reserved.

ARTICLE III. STANDARDS

Sec. 1-36. General standards.

(A) All development or redevelopment to which this ordinance applies shall comply with the standards of this section.

(B) A 50-foot wide undisturbed vegetative buffer for new development activities and a 30-foot wide undisturbed vegetative buffer for redevelopment activities is required. The width of a buffer is measured horizontally from the normal pool elevation of impounded structures, from the top of bank for each side of streams or rivers, and from the mean high waterline of tidal waters, perpendicular to the shoreline. The vegetative buffer may be cleared or graded, but at a minimum must be planted with and maintained in grass or any other vegetative or plant material. The Town of Navassa may, on a case by case basis, grant a minor variance from the vegetative buffer requirements of this section pursuant to the procedures set out in 15A NCAC 02B.0233(9)(a and b).

Vegetative buffers and filters required by this section and any other buffers or filters required by state water quality or coastal management rules or local government requirements may be met concurrently and may contain, in whole or in part, coastal, isolated, or 404 jurisdictional wetlands that are located landward of the normal waterline.

- (1) Approved stormwater control best management practices (BMPs), or stormwater control structures, with the exception of wet retention ponds are allowed in the buffer and the area required to construct the practices may be disturbed.
- (2) Picnic areas, benches, and water dependent structures including, but not limited to, boat docks, boat ramps, and bulkheads are allowed in the buffer and the area required to construct the practices may be disturbed provided that they have received all applicable federal, state, and local permits and approvals.
- (3) Development in urban waterfronts that meet the requirements of 15A NCAC 07H .0209(g), development in new urban waterfront areas that meet the requirements of Session Law 2004-117, those activities listed in 15A NCAC 07H .0209(d)(10)(A) through 15A NCAC 07H .0209(d)(10)(H), and development of upland marinas that have received a Coastal Area Management Act Major Permit are allowed in the buffer and the area required to construct the practices may be disturbed.
- (4) ***Buffer Management and Maintenance.*** The buffer, including wetlands and floodplains, shall be managed to enhance and maximize the unique value of these resources. Management and maintenance includes specific limitations on alteration of the natural conditions of these resources. Any substantial vegetation that is removed must be replaced accordingly. The following management and maintenance practices and activities are permitted within the buffer area:

- a. General pruning of trees.
- b. Removal and replacement of dead or diseased plant materials, and clearing nuisance of underbrush.
- c. The application of pesticides by appropriate and qualified professionals for the spraying of noxious weeds or non-native species as listed by the North Carolina Department Agriculture and Consumer Services.
- d. Stream restoration projects, facilities and activities approved by federal, state, or local agencies.
- e. Individual trees within the forest buffer may be removed which are in immediate danger of falling and causing damage to dwellings, other structures, or causing blockage of the stream.
- f. Other timber cutting techniques approved by the agency may be undertaken within the forest buffer under the advice and guidance of North Carolina Division of Forest Resources, North Carolina Cooperative Extension Service, or the United States Department of Agriculture, if necessary to preserve the forest from extensive pest infestation, disease infestation, or threat from fire.
- g. Repairing erosion problems internal to the buffer.
- h. Removal of debris after a storm event.

(C) For the purposes of this section, areas defined as Coastal Wetlands under 15A NCAC 07H .0205, as measured landward from the normal high waterline, shall not be included in the overall project area to calculate impervious surface density. Wetlands that are not regulated as coastal wetlands pursuant to 15A NCAC 07H.0205 and that are located landward of the normal high waterline may be included in the overall project area to calculate impervious surface density.

Sec. 1-37. Development or redevelopment standards for low-density projects.

Low-density projects shall comply with each of the following standards:

(A) Stormwater runoff from the development shall be transported from the development primarily by vegetated conveyances. As used in this section, "conveyance system" shall not include a stormwater collection system. Stormwater runoff from built upon or disturbed areas that is directed to flow through any wetlands shall flow into and through these wetlands at a non-erosive velocity. In the event that excessive erosion is found to occur after the construction and final inspection, it shall be the responsibility of the permittee to make the necessary corrections to halt and prevent the erosion as well as repair the damage caused by the erosion.

(B) All built upon area from redevelopment shall be at least 30 feet landward of all perennial and intermittent surface waters and all built upon area from new development shall be at least 50 feet landward of all perennial and intermittent surface waters. A perennial or intermittent surface water shall be deemed present if the feature is approximately shown on either the most recent version of the soil survey map prepared by the Natural Resources Conservation Service of the United States Department of Agriculture (USDA) or the most recent version of the 1:24,000 scale (7.5 minute) quadrangle topographic maps prepared by the United States Geologic Survey (USGS). An exception to this requirement may be allowed when surface waters are not present in accordance with the provisions of 15A NCAC 2B.0233(3)(a) or similar site-specific determination made using Division-approved methodology.

- (1) Development in urban waterfronts that meet the requirements of 15A NCAC 07H .0209(g), development in new urban waterfront areas that meet the requirements of Session Law 2004-117, those activities listed in 15A NCAC 07H .0209(d)(10)(A) through 15A NCAC 07H .0209(d)(10)(H), development of upland marinas, and water dependant structures including, but not limited to, boat docks, boat ramps, and bulkheads are allowed within 30 ft of surface waters provided that they have received all applicable federal, state, and local permits and approvals.

(C) A condition of the issuance of the stormwater management permit shall require an enforceable restriction on property usage that runs with the land, such as a recorded deed restriction or protective covenants or both, to ensure that future development and redevelopment maintains the site consistent with the approved project plans.

Sec. 1-38. Development or redevelopment standards for high-density projects.

High-density projects shall implement stormwater control measures that comply with each of the following standards:

(A) The measures shall control and treat runoff from all surfaces generated by one and one-half inches of rain. In addition, projects that are located within one-half mile and draining to SA Waters must control and treat the difference in stormwater runoff from the pre- and post-development conditions for the 1-year, 24-hour storm. Runoff volume draw down time shall be a minimum of 48 hours, but not more than 120 hours.

(B) All structural stormwater treatment systems used to meet these requirements shall be designed to have a minimum of 85% average annual removal for Total Suspended Solids (TSS).

(C) General engineering design criteria for all projects shall be in accordance with 15A NCAC 2H.1008, or as explained in the Design Manuals.

(D) All built-upon area from redevelopment shall be 30 feet landward of all perennial and intermittent surface waters and all built upon area from new development shall be at least 50 feet landward of all perennial and intermittent surface waters. A surface water shall be deemed

present if the feature is approximately shown on either the most recent version of the soil survey map prepared by the Natural Resources Conservation Service of the United States Department of Agriculture (USDA) or the most recent version of the 1:24,000 scale (7.5 minute) quadrangle topographic maps prepared by the United States Geologic Survey (USGS). An exception to this requirement may be allowed when surface waters are not present in accordance with the provisions of 15A NCAC 2B.0233(3)(a) or similar site-specific determination made using Division-approved methodology.

- (1) Development in urban waterfronts that meet the requirements of 15A NCAC 07H .0209(g), development in new urban waterfront areas that meet the requirements of Session Law 2004-117, those activities listed in 15A NCAC 07H .0209(d)(10)(A) through 15A NCAC 07H .0209(d)(10)(H), development of upland marinas, and water dependant structures including, but not limited to, boat docks, boat ramps, and bulkheads are allowed within 30 ft of surface waters provided that they have received all applicable federal, state, and local permits and approvals.

(E) Stormwater runoff from built upon or disturbed areas that is directed to flow through any wetlands shall flow into and through these wetlands at a non-erosive velocity. In the event that excessive erosion is found to occur after the construction and final inspection, it shall be the responsibility of the permittee to make the necessary corrections to halt, prevent, and restore the erosion.

(F) A condition of the issuance of the stormwater management permit shall require an enforceable restriction on property usage that runs with the land, such as recorded deed restrictions or protective covenants or both, to ensure that future development and redevelopment maintains the site consistent with the approved project plans.

Sec. 1-39. Reserved.

Sec. 1-40. Standards for stormwater control measures.

(A) *Evaluation according to contents of Design Manuals.* All stormwater control measures and stormwater treatment practices (also referred to as Best Management Practices, or BMPs) required under this ordinance shall be evaluated by the Stormwater Administrator according to the policies, criteria, information, technical specifications, standards, and the specific design criteria for each stormwater practice in the Design Manuals. The Stormwater Administrator shall determine whether BMPs in the plan will be adequate to meet the requirements of this ordinance.

(B) *Determination of adequacy; presumptions and alternatives.* Stormwater treatment practices that are designed, constructed, and maintained in accordance with the criteria and specifications in the Design Manuals shall be presumed to meet the water quality and quantity performance standards of this ordinance. Whenever a plan proposes to utilize a practice or practices not designed and constructed in accordance with the criteria and specifications in the

Design Manuals, the applicant shall have the burden of demonstrating that the practice shall satisfy the water quality and quantity performance standards of this ordinance. The Stormwater Administrator may require the applicant to provide the documentation, calculations, and examples necessary for the Stormwater Administrator to determine whether such an affirmative showing is made.

(C) *Separation from seasonal high water table.* For structural stormwater controls that require separation from the seasonal highwater table, a minimum separation of two feet is required. Where a separation of two feet from the seasonal highwater table is not practicable, the Navassa Stormwater Administrator may grant relief from the separation requirement pursuant to the Alternative Design Criteria set out in 15A NCAC 02H.1008(h) on a case-by-case basis, provided that the applicant can demonstrate that the design criteria shall provide equal or better stormwater control, equal or better protection of waters of the state, and result in no increased potential for nuisance conditions. No separation from the seasonal highwater table is required for a secondary stormwater best management practice that is used in a series with another stormwater best management practice; however the secondary BMP must demonstrate proper function.

Sec. 1-41. Reserved.

Sec. 1-42. Variances.

(A) Any person may petition the Town of Navassa Board of Adjustment for a variance granting permission to use the person's land in a manner otherwise prohibited by this ordinance. To qualify for a variance, the petitioner must show all of the following:

- (1)** Unnecessary hardships would result from strict application of this ordinance.
- (2)** The hardships result from conditions that are peculiar to the property, such as the location, size, or topography of the property.
- (3)** The hardships did not result from actions taken by the petitioner.
- (4)** The requested variance is consistent with the spirit, purpose, and intent of this ordinance; shall secure public safety and welfare; and shall preserve substantial justice.

(B) The Town of Navassa Board of Adjustment may impose reasonable and appropriate conditions and safeguards upon any variance it grants.

(C) Notwithstanding subparagraph (A) of this section, exceptions from the 30-foot or 50-foot landward location of built-upon area requirement as well as the deed restrictions and protective covenants requirements shall be granted in any of the following instances:

- (1) When there is a lack of practical alternatives for a road crossing, railroad crossing, bridge, airport facility, or utility crossing as long as it is located, designed, constructed, and maintained to minimize disturbance, provide maximum nutrient removal, protect against erosion and sedimentation, have the least adverse effects on aquatic life and habitat, and protect water quality to the maximum extent practicable through the use of BMPs.
- (2) When there is a lack of practical alternatives for a stormwater management facility; a stormwater management pond; or a utility, including, but not limited to, water, sewer, or gas construction and maintenance corridor, as long as it is located 15 feet landward of all perennial and intermittent surface waters and as long as it is located, designed, constructed, and maintained to minimize disturbance, provide maximum nutrient removal, protect against erosion and sedimentation, have the least adverse effects on aquatic life and habitat, and protect water quality to the maximum extent practicable through the use of BMPs.
- (3) A lack of practical alternatives may be shown by demonstrating that, considering the potential for a reduction in size, configuration, or density of the proposed activity and all alternative designs, the basic project purpose cannot be practically accomplished in a manner which would avoid or result in less adverse impact to surface waters.

Sec. 1-43. Pet Waste.

(A) *Dogs At Large Prohibited.* It shall be unlawful for the owner of any dog to allow the animal to be off the premises of his or her owner and not on a leash in the Town of Navassa pursuant to Navassa Ordinance No. 2002, 001-03.

(B) *Pet Waste Disposal.* The town acknowledges that pet waste is a serious water quality and public health issue. Stormwater runoff washes bacteria, parasites, viruses, and nutrients from pet waste directly into local waterways contributing to a variety of environmental and public health problems.

- (1) The town strongly discourages the owner or custodian of any animal to take it off the owner's own property limits without the means to properly remove and dispose of the animal's feces from any public or private property.
- (2) It is the responsibility of an animal's owner or custodian to clean up the animal's feces from any public or private property outside of the animal owner's own property limits. Such property includes, but is not limited to, parks, rights-of-way, paths, sidewalks, and public access areas.
- (3) "Means to properly remove and dispose of feces" shall consist of having on or near one's person a device such as a plastic bag, or other suitable plastic or paper container, that can be used to clean up and contain animal waste until it can be

disposed of in an appropriate trash container. Pet waste shall not be flushed down a toilet into the sanitary sewer system, but shall be properly disposed of in a trash receptacle.

- (4) “Public nuisance” is defined to include an animal which deposits feces on public property or on private property without the consent of the owner or person in lawful possession of the private property, and the person owning, possessing, harboring or having the care, charge, control or custody of the animal fails to remove the feces so deposited.
- (5) This provision shall not apply to a service animal accompanying a person with a disability or to an animal being used by law enforcement officers when doing so would prevent the officers from carrying out their official responsibilities.

(C) *Pet Waste Stations.* All new developments requiring a stormwater permit and that create public open space as required by the Navassa Subdivision Ordinance and Zoning Ordinance shall be required to provide pet waste stations which shall consist of educational signage, a plastic pet waste bag dispenser and an appropriate trash container in order to make it easier for citizens to pick up after their pet. Pet waste stations shall be provided at a rate of one (1) station per one and a half (1.5) acres of public open space provided, with area calculations being rounded up to the next whole number of pet stations provided. For example, a subdivision providing one and seven tenths (1.7) of an acre of public open space shall provide two (2) pet waste stations and a development providing half (0.5) an acre of public open space shall provide one (1) pet waste station. Developments providing required public open space that is less than half (0.5) of an acre are exempt from the requirements of providing pet waste stations. Pet waste stations shall be properly maintained by the property owner, a homeowners’ association, property owners’ association, or similar entity in order to ensure that the educational signage remains in good condition, the trash container is emptied on a regular basis and that pet waste bags are made available to the public.

Secs. 1-44.--1-53. Reserved.

ARTICLE IV. MAINTENANCE

Sec. 1-54. General Standards for Maintenance.

(A) *Function of BMPs as intended.* The permittee of each structural BMP installed pursuant to this ordinance shall maintain and operate it so as to preserve and continue its function in controlling stormwater quality and quantity at the degree or amount of function for which the structural BMP was designed. This includes all pipes and channels built to convey stormwater to the facility, as well as all structures, improvements, and vegetation provided to control the quantity and quality of the stormwater. Adequate maintenance is herein defined as good working condition so that these facilities are performing their design functions.

(B) *Annual maintenance inspection and report.* The permittee responsible for maintenance of any structural BMP installed pursuant to this ordinance shall submit to the Stormwater Administrator an annual maintenance and inspection report for the calendar year due on or before February 1st of the following year to include each separate BMP permitted. The permittee shall submit both an electronic copy and hard copy of the annual maintenance and inspection report to the Stormwater Administrator. The purpose of the inspection is to assure compliance with the stormwater permit and operation and maintenance agreement. The inspection shall cover the entire stormwater system including but not limited to pipes, channels, swales, vegetation, berms, outlet/inlet structures, pond areas, etc. Any deficiencies shall be noted in the inspection report. The annual report shall include copies of monthly maintenance activity reports. Inspection reports shall be on a Town approved form(s) supplied by the Stormwater Administrator, and shall be executed by one of the following persons performing services only in their area of certification: a registered North Carolina professional engineer, surveyor, landscape architect, soil scientist, aquatic biologist, or person certified by the North Carolina Cooperative Extension Service for stormwater treatment practice inspection and maintenance. Failure to submit the annual maintenance and inspection report by the deadline specified above shall be treated as a breach of the operations and maintenance agreement and shall be considered a violation of this ordinance and shall be punishable by any enforcement capabilities provided to the Town of Navassa by this ordinance or the General Statutes of North Carolina.

Sec. 1-55. Operation and Maintenance Agreement.

(A) *In general.* Prior to the conveyance or transfer of any lot or building site to be served by a structural BMP pursuant to this ordinance, and prior to issuance of any permit for development or redevelopment requiring a structural BMP pursuant to this ordinance, the applicant or owner of the site must execute an operation and maintenance agreement that shall be binding on all subsequent owners of the site, portions of the site, and lots or parcels served by the structural BMP. The permittee shall have primary responsibility for carrying out the provisions of the maintenance agreement. A separate operations and maintenance agreement shall be executed for each individual BMP associated with the development. Each of these separate agreements shall be combined and submitted to the stormwater administrator as a single comprehensive operation and maintenance agreement for the entire development or phase being

permitted. An electronic copy and hard copy of the comprehensive operation and maintenance agreement shall be provided to the Stormwater Administrator.

The operation and maintenance agreement shall have a statement acknowledging that the permittee shall adequately and continuously operate and maintain the stormwater control and management facilities. This includes all pipes and channels built to convey stormwater to the facility, as well as all structures, improvements, and vegetation provided to control the quantity and quality of the stormwater. Adequate maintenance is herein defined as good working condition so that these facilities are performing their design functions.

The operation and maintenance agreement shall require the permittee to maintain, repair, and, if necessary, reconstruct the structural BMP, and shall state the terms, conditions, and schedule of maintenance for each structural BMP. Monthly inspections reports are required for each structural BMP. Reports of monthly inspections and maintenance activities shall be kept in a location available for review by the Stormwater Administrator and shall be included in the annual report submitted to the town.

In addition, the operation and maintenance agreement shall grant to the Town of Navassa a right of entry in the event that the Stormwater Administrator has reason to believe it has become necessary to inspect, monitor, maintain, repair, or reconstruct the structural BMP; however, in no case shall the right of entry, of itself, confer an obligation on the Town of Navassa to assume responsibility for the structural BMP. The operation and maintenance agreement shall have a written statement specifying that the agreement shall not obligate the Town of Navassa to maintain or repair any structural BMPs, and the Town of Navassa shall not be liable to any person for the condition or operation of structural BMPs.

The operation and maintenance agreement shall also have a written statement that the agreement shall not in any way diminish, limit, or restrict the right of the Town of Navassa to enforce any of its ordinances as authorized by law. The agreement shall also include a provision indemnifying and holding harmless the Town of Navassa for any costs and injuries arising from or related to the structural BMP, unless the Town of Navassa has agreed in writing to assume the maintenance responsibility for the BMP and has accepted dedication of any and all rights necessary to carry out that maintenance.

The operation and maintenance agreement must be approved by the Stormwater Administrator prior to plan approval, and it shall be referenced on the final plat and shall be recorded with the county Register of Deeds upon final plat approval. Two (2) copies of the recorded maintenance agreement shall be given to the Stormwater Administrator within fourteen (14) days following its recordation.

(B) *Special requirement for homeowners' and other associations.* For all structural BMPs required pursuant to this ordinance and that are to be or are owned and maintained by a homeowners' association, property owners' association, or similar entity, the required operation and maintenance agreement shall include all of the following provisions:

- (1) For projects involving the creation of a homeowners' association, property owners' association, or similar entity, the operations and maintenance agreement shall be transferred from the developer to the owner's association upon the proper submittal of the as-built drawings and the final inspection and final approval by the Stormwater Administrator. The transference of the operations and maintenance agreement from the developer to the owners' association shall be submitted in writing and approved by the Stormwater Administrator. At such time the operations and maintenance agreement is transferred from the developer to the owners' association the owners' association shall be considered the permittee and shall be responsible for all of the requirements identified in this ordinance including but not limited to: maintenance of the stormwater BMPs, submittal of the annual maintenance and inspection report, proper management of the structural BMP reserve fund, and each requirement of the operations and maintenance agreement.

- (2) Establishment of a structural BMP reserve fund with the homeowners' association, property owners' association, or similar entity, which can be expended solely for the cost of sediment or vegetative removal; structural, or vegetative replacement; repair; or reconstruction of the structural BMPs. If structural BMPs are not performing adequately or as intended or are not properly maintained, the homeowners' association, property owners' association, or similar entity shall remedy the situation using money from the reserve fund, and in such instances the reserve fund shall be fully reimbursed within a period of five (5) years from the date of the expenditure. The amount of money reimbursed into the structural BMP reserve fund shall account for inflation by using the appropriate construction cost index as published in the January publication of the Engineering News Record (ENR) for the given year in which the reimbursement is deposited into the reserve fund account. An annual financial report of the reserve fund shall be submitted to the Town as part of the required annual inspection report in order for the Stormwater Administrator to verify that any required deposits have been made into the reserve fund and to verify that any expenditures from the reserve fund are for purposes allowed by this ordinance.

Any expenditures from the reserve fund that are not listed as a permitted expenditure shall be replaced prior to the submittal of the annual maintenance and inspection report for the upcoming calendar year. The amount of money reimbursed into the structural BMP reserve fund shall account for inflation by using the appropriate construction cost index as published in the January publication of the Engineering News Record (ENR) for the given year in which the reimbursement is deposited into the reserve fund account. Failure to replace unpermitted funds expended from the reserve fund by the following annual maintenance and inspection report shall be treated as a breach of the operations and maintenance agreement and shall constitute a violation of this ordinance and shall be punishable by

any enforcement capabilities provided to the Town of Navassa by this ordinance or the General Statutes of North Carolina.

- (3) The structural BMP reserve fund shall be funded by the permittee. Prior to transference of the stormwater permit from the developer to the homeowners' association, property owners' association, or similar entity, the developer shall pay into the structural BMP reserve fund an amount equal to ten percent (10%) of the estimated construction cost of the structural BMPs. Construction cost estimates shall be certified by an engineer and shall bear the seal of the engineer providing the construction cost estimate. The permittee shall then pay an additional ten percent (10%) of the certified construction costs annually for the next four years until the reserve fund totals fifty percent (50%) of the total certified estimate of construction costs of the structural BMPs. All reserve fund contributions, except for the initial contribution by the developer, shall be equally funded by each member of the owners' association based on their proportionate share of lots within the development. Each reserve fund contribution must be deposited for the calendar year due on or before February 1st of the following year and shall be reflected on the annual reserve fund financial report that shall be submitted as part of the required annual maintenance and inspection report.
- (4) Allowing the Town of Navassa to recover from the association and its member's any and all costs the Town of Navassa expends to maintain or repair the structural BMPs or to correct any operational deficiencies. Failure to pay the Town of Navassa all of its expended costs, after forty-five (45) days written notice, shall constitute a breach of the agreement and a violation of this ordinance. In case of a deficiency, the Town of Navassa shall thereafter be entitled to bring an action against the association and its members to pay, or foreclose upon the lien hereby authorized by the agreement against the property, or both. Interest, collection costs, and attorney fees shall be added to the recovery.

Sec. 1-56. Inspection Program.

Inspections and inspection programs by the Town of Navassa may be conducted or established on any reasonable basis, including but not limited to routine inspections; random inspections; inspections based upon complaints or other notice of possible violations; and joint inspections with other agencies inspecting under environmental or safety laws. Inspections may include, but are not limited to, reviewing maintenance and repair records; sampling discharges, surface water, groundwater, and material or water in BMPs; and evaluating the condition of BMPs.

If the owner or occupant of any property refuses to permit such inspection, the Stormwater Administrator shall proceed to obtain an administrative search warrant pursuant to

G.S. 15-27.2 or its successor. No person shall obstruct, hamper or interfere with the Stormwater Administrator while carrying out his or her official duties.

Sec. 1-57. Performance Guarantee for Installation.

(A) *May be required.* In lieu of requiring the completion, installation, and dedication of all improvements prior to final plat approval the town council may, at its discretion, enter into an agreement with the applicant whereby the applicant shall agree to complete all required improvements. Once said agreement is signed by both parties and the security required herein is provided, the final plat may be approved, if all other requirements of this article are met. To secure this agreement, the applicant shall provide, subject to the approval of the town council, a performance guarantee that could be bond with surety, cash escrow, letter of credit or other acceptable legal arrangement for one and twenty-five one-hundredths (1.25) times the entire cost of the guaranteed improvements. Construction cost estimates shall be certified by an engineer and shall bear the seal of the engineer providing the construction cost estimate.

The performance guarantee will ensure that BMP's are installed by the permittee as required by the approved stormwater management plan.

(B) *Uses of performance guarantee.*

- (1) *Forfeiture provisions.* The performance guarantee shall contain forfeiture provisions for failure, after notice, to complete work within the time specified, or to initiate or maintain any actions which may be required of the permittee in accordance with this ordinance, permits issued pursuant to this ordinance, or an operation and maintenance agreement established pursuant to this ordinance.
- (2) *Default.* Upon default, meaning failure on the part of the permittee to complete the required improvements in a timely manner as specified in the performance guarantee then the surety, or the financial institution holding the escrow or letter of credit account shall if requested by the Town Council, pay all or any portion of the guarantee to the Town up to the amount needed to complete the improvements based upon an engineering estimate. Upon payment, the Town Council, at its discretion, may expend such portion of said funds as it deems necessary to complete all or any portion of the required improvements. Such expenditure of funds shall only be made after a written request to the owner to comply with the permit or maintenance agreement. The town shall return to the permittee any funds not spent in completing the improvements.
- (3) *Costs in excess of performance guarantee.* If the Town of Navassa takes action upon such failure by the permittee, the town may collect from the permittee the difference between the amount of the reasonable cost of such action and the amount of the security held, in addition to any other penalties or damages due.

- (4) **Refund.** Within sixty (60) days of the final approval, the installation performance security shall be refunded to the applicant or terminated, except any amount attributable to the cost (plus 25%) of landscaping installation and ongoing maintenance associated with the BMPs covered by the security. Any such landscaping shall be inspected one (1) year after installation and deficiencies shall be corrected for compliance with the approved plans and specifications and, if in compliance, the portion of the financial security attributable to landscaping shall be released.

Sec. 1-58. Notice to owners.

(A) **Deed recordation and indications on plat.** The applicable operations and maintenance agreement or conservation easement (whichever is applicable) pertaining to every structural BMP on the plan shall be referenced on the final plat and shall be recorded with the county Register of Deeds upon final plat approval. If no subdivision plat is recorded for the site, then the operations and maintenance agreement or conservation easement (whichever is applicable), shall be recorded with the county Register of Deeds so as to appear in the chain of title of all subsequent purchasers under generally accepted searching principles.

(B) **Signage.** In order to assure compliance with this ordinance, structural BMPs shall be posted with a conspicuous sign stating who is responsible for required maintenance and annual inspection. The sign shall be maintained so as to remain visible and legible.

Sec. 1-59. Records of installation and maintenance activities.

The owner of each structural BMP shall keep records of inspections, maintenance, and repairs for at least ten (10) years from the date of creation of the record and shall submit the same upon request to the Stormwater Administrator.

Sec. 1-60. Nuisance.

The owner of each stormwater BMP, whether structural or non-structural, shall maintain it so as not to create or result in a nuisance condition.

Sec. 1-61. Maintenance easement.

Every structural BMP installed pursuant to this ordinance shall be made accessible for adequate maintenance and repair by a maintenance easement. The easement shall be recorded and its terms shall specify who may make use of the easement and for what purposes.

Secs. 1-62.--1-71. Reserved.

ARTICLE V. ENFORCEMENT AND VIOLATIONS

Sec. 1-72. General.

(A) Authority to enforce. The provisions of this ordinance shall be enforced by the Stormwater Administrator, his or her designee, or any authorized agent of the Town of Navassa. Whenever this Article refers to the Stormwater Administrator, it includes his or her designee as well as any authorized agent of the Town of Navassa.

(B) Violation unlawful. Failure to comply with any applicable requirement, prohibition, standard, or limitation imposed by this ordinance, or the terms or conditions of any permit or other development or redevelopment approval or authorization granted pursuant to this ordinance, is unlawful and shall constitute a violation of this ordinance.

(C) Each day a separate offense. Each day that a violation continues shall constitute a separate and distinct violation or offense.

(D) Penalty assessed after notice served. No penalty shall be assessed until the person alleged to be in violation has been served notice of the violation, except as provided below. Refusal to accept the notice shall not relieve the violator of the obligation to pay such penalty.

(E) Responsible persons/entities. Any person who erects, constructs, reconstructs, alters (whether actively or passively), or fails to erect, construct, reconstruct, alter, repair or maintain any structure, BMP, practice, or condition in violation of this ordinance shall be subject to the remedies, penalties, or enforcement actions in accordance with this Article. Persons subject to the remedies and penalties set forth herein may include any architect, engineer, builder, contractor, developer, agency, or any other person who participates in, assists, directs, creates, causes, or maintains a condition that results in or constitutes a violation of this ordinance, or fails to take appropriate action, so that a violation of this ordinance results or persists; or an owner, any tenant or occupant, or any other person, who has control over, or responsibility for, the use or development of the property on which the violation occurs.

For the purposes of this article, responsible person(s) shall include but not be limited to:

- (1) Person maintaining condition resulting in or constituting violation.** An architect, engineer, builder, contractor, developer, agency, or any other person who participates in, assists, directs, creates, causes, or maintains a condition that constitutes a violation of this ordinance, or fails to take appropriate action, so that a violation of this ordinance results or persists.
- (2) Responsibility for land or use of land.** The owner of the land on which the violation occurs, any tenant or occupant of the property, any person who is responsible for stormwater controls or practices pursuant to a private agreement or public document, or any person, who has control over, or responsibility for, the use, development or redevelopment of the property.

Sec. 1-73. Remedies and penalties.

The remedies and penalties provided herein, whether civil or criminal, are not exclusive; may be exercised singly, simultaneously, or cumulatively; may be combined with any other remedies authorized under the law; and may be exercised in any order.

(A) Remedies.

- (1) ***Withholding of Certificate of Occupancy.*** The Stormwater Administrator or other authorized agent may refuse to issue a Certificate of Occupancy for the building or other improvements constructed or being constructed on the site and served by the stormwater practices in question until the applicant or other responsible person has taken the remedial measures set forth in the notice of violation or has otherwise cured the violations described therein.
- (2) ***Disapproval of subsequent permits and developments approvals.*** As long as a violation of this ordinance continues and remains uncorrected, the Stormwater Administrator or other authorized agent may withhold, and the Town of Navassa Town Council, Planning Board, Planning Department, and Building Inspections Department may disapprove, any request for permit or development approval or authorization provided for by this ordinance or the Zoning, Subdivision, or Building regulations for the land on which the violation occurs.
- (3) ***Injunction, abatements, etc.*** The Stormwater Administrator, with the written authorization of the Town of Navassa Town Administrator, may institute an action in a court of competent jurisdiction for a mandatory or prohibitory injunction and order of abatement to correct a violation of this ordinance. Any person violating this ordinance shall be subject to the full range of equitable remedies provided in the General Statutes or at common law.
- (4) ***Correction as public health nuisance, costs as lien, etc.*** If the violation is deemed dangerous or prejudicial to the public health or public safety and is within the geographic limits prescribed by North Carolina G.S. § 160A-193, the Stormwater Administrator, with the written authorization of the Town of Navassa Town Administrator, may cause the violation to be corrected and the costs to be assessed as a lien against the property.
- (5) ***Stop work order.*** The Stormwater Administrator may issue a stop work order to the person violating this ordinance. The stop work order shall remain in effect until the person has taken the remedial measures set forth in the notice of violation or has otherwise cured the violation or violations described therein. The stop work order may be withdrawn or modified to enable the person to take the necessary remedial measures to cure such violation or violations.

(B) Civil penalties.

- (1)** Any Person who allows, acts in concert, participates, directs, or assists directly or indirectly in the creation of a violation of this article is subject to a civil penalty. A civil penalty may be assessed from the date the violation first occurs.
- (2)** Civil penalties may be assessed up to the full amount of penalty to which the Town of Navassa is subject for violations of its NPDES Stormwater permit, or \$5,000.00 for each violation of this article, whichever is greater. Each day of violation shall constitute a separate violation.
- (3)** Penalties may be assessed concurrently with a notice of violation for any of the following:
 - a.** Obstructing, hampering, or interfering with an authorized Town representative who is in the process of carrying out official duties under this article;
 - b.** A repeated violation for which a notice of violation was previously given to the person responsible for the violation; or
 - c.** Willful violation of this article.
- (4)** In determining the amount of a civil penalty, the Stormwater Administrator shall consider any relevant mitigating and aggravating factors including:
 - a.** Degree and extent of harm caused by the violation;
 - b.** Cost of rectifying the damage;
 - c.** Amount of money saved through non-compliance;
 - d.** Whether the violator took reasonable measures to comply with this article;
 - e.** Knowledge of the requirements by the violator and/or reasonable opportunity or obligation to obtain such knowledge;
 - f.** Whether the violator voluntarily took reasonable measures to restore any areas damaged by the violation;
 - g.** Whether the violation was committed willfully;
 - h.** Whether the violator reported the violation to an appropriate authority;
 - i.** Technical and economic reasonableness of reducing or eliminating the discharge; and
 - j.** Prior record of the violator in complying or failing to comply with this article or any other water pollution control ordinance or regulation.

- (5) The Stormwater Administrator shall determine the amount of the civil penalty to be assessed under this Article and shall make written demand for payment upon the person in violation and shall set forth in detail a description of the violation for which the penalty was imposed. Notice of said assessment shall be by registered or certified mail or other means reasonably calculated to give adequate notice. If a violator does not pay a civil penalty assessed by the Town within thirty (30) days after it is due, the Stormwater Administrator shall request the Town Attorney to institute a civil action to recover the amount of the assessment. The civil action shall be brought in Brunswick County Superior Court or in any other court of competent jurisdiction. Such civil actions must be filed within three (3) years of the date the notice of assessment was served on the violator.
- (6) An assessment that is not contested is due when the violator is served with a notice of assessment. An assessment that is contested is due at the conclusion of the administrative and judicial review of the assessment.
- (7) Civil penalties collected pursuant to this Article shall be credited to the Town of Navassa general fund as a non-tax revenue.
- (8) A violation of this Article shall not constitute a misdemeanor or infraction punishable under G.S. 14-4, but instead shall be subject to the civil penalties fixed by this Article.

Sec. 1-74. Procedures.

(A) **Initiation/complaint.** Whenever a violation of this ordinance occurs, or is alleged to have occurred, any person may file a written complaint. Such complaint shall state fully the alleged violation and the basis thereof, and shall be filed with the Stormwater Administrator, who shall record the complaint. The complaint shall be investigated promptly by the Stormwater Administrator.

(B) **Inspection.** The Stormwater Administrator shall have the authority, upon presentation of proper credentials, to enter and inspect any land, building, structure, or premises to ensure compliance with this ordinance.

(C) **Notice of violation and order to correct.** When the Stormwater Administrator finds that any building, structure, or land is in violation of this ordinance, the Stormwater Administrator shall notify, in writing, the property owner or other person violating this ordinance. The notification shall indicate the nature of the violation, contain the address or other description of the site upon which the violation is occurring, order the necessary action to abate the violation, and give a deadline for correcting the violation. If civil penalties are to be assessed, the notice of violation shall also contain a statement of the civil penalties to be assessed, the time of their accrual, and the time within which they must be paid or be subject to collection as a debt.

The Stormwater Administrator may deliver the notice of violation and correction order personally, by the Town of Navassa Police Department, Town of Navassa Code Enforcement Officer, by certified or registered mail, return receipt requested, or by any means authorized for the service of documents by Rule 4 of the North Carolina Rules of Civil Procedure.

If a violation is not corrected within the period of time provided in the notification, the Stormwater Administrator may take appropriate action under this ordinance to correct and abate the violation and to ensure compliance with this ordinance.

(D) *Extension of time.* A person who receives a notice of violation and correction order, or the owner of the land on which the violation occurs, may submit to the Stormwater Administrator a written request for an extension of time for correction of the violation. On determining that the request includes enough information to show that the violation cannot be corrected within the specified time limit for reasons beyond the control of the person requesting the extension, the Stormwater Administrator may extend the time limit as is reasonably necessary to allow timely correction of the violation. The Stormwater Administrator may grant extensions in addition to the foregoing extension if the violation cannot be corrected within the permitted time due to circumstances beyond the control of the person violating this ordinance. The Stormwater Administrator may grant an extension only by written notice of extension. The notice of extension shall state the date prior to which correction must be made, after which the violator shall be subject to the penalties described in the notice of violation and correction order.

(E) *Enforcement after time to correct.* After the time has expired to correct a violation, including any extension if authorized by the Stormwater Administrator, the Stormwater Administrator shall determine if the violation is corrected. If the violation is not corrected, the Stormwater Administrator may act to impose one or more of the remedies and penalties authorized by this ordinance.

(F) *Emergency enforcement.* If delay in correcting a violation would seriously threaten the effective enforcement of this ordinance or pose an immediate danger to the public health, safety, or welfare, then the Stormwater Administrator may order the immediate cessation of a violation. Any person so ordered shall cease any violation immediately. The Stormwater Administrator may seek immediate enforcement, without prior written notice, through any remedy or penalty authorized by this Article.

Secs. 1-75.--1-84. Reserved.

ARTICLE VI. RESERVED

Secs. 1-85.--1-95. Reserved.

ARTICLE VII. ILLICIT DISCHARGES

Sec. 1-96. Illicit discharges and connections.

(A) *Illicit discharges.* The discharge, emission, disposal, pouring, or pumping directly or indirectly any liquid, solid, gas, or other substance, other than stormwater to any stormwater conveyance, the waters of the State, or upon the land in a manner or amount that the substance is likely to reach a stormwater conveyance or the waters of the State is prohibited. Prohibited substances include: oil, anti-freeze, chemicals, animal waste, paints, garbage, debris, or litter.

(B) *Exemptions.* Non-stormwater discharges associated with the following activities are allowed provided that they do not significantly impact water quality:

- (1) Water line flushing;
- (2) Landscape irrigation;
- (3) Diverted stream flows;
- (4) Rising ground waters;
- (5) Uncontaminated ground water infiltration (as defined at 40 CFR 35.2005(20));
- (6) Uncontaminated pumped ground water;
- (7) Discharges from potable water sources;
- (8) Foundation drains;
- (9) Air conditioning condensation;
- (10) Irrigation water;
- (11) Springs;
- (12) Water from crawl space pumps;
- (13) Footing drains;
- (14) Lawn watering;
- (15) Individual residential car washing;
- (16) Flows from riparian habitats and wetlands;
- (17) Dechlorinated swimming pool discharges;

- (18) Street wash water; and
- (19) Other non-stormwater discharges for which a valid NPDES discharge permit has been approved and issued by the State of North Carolina, and provided that any such discharges to the municipal separate storm sewer system shall be authorized by the Town of Navassa.

(C) *Illicit connections.*

- (1) Connections to a stormwater conveyance or stormwater conveyance system that allow the discharge of non-stormwater, other than the exclusions described in subsection (A) above, are unlawful. Prohibited connections include, but are not limited to: floor drains, waste water from washing machines or sanitary sewers, wash water from commercial vehicle washing or steam cleaning, and waste water from septic systems.
- (2) Where such connections exist in violation of this section and said connections were made prior to the adoption of this provision or any other ordinance prohibiting such connections, the property owner or the person using said connection shall remove the connection within one (1) year following the effective date of this ordinance. However, the one-year grace period shall not apply to connections which may result in the discharge of hazardous materials or other discharges which pose an immediate threat to health and safety, or are likely to result in immediate injury and harm to real or personal property, natural resources, wildlife, or habitat.
- (3) Where it is determined that said connection:
 - a. May result in the discharge of hazardous materials or may pose an immediate threat to health and safety, or is likely to result in immediate injury and harm to real or personal property, natural resources, wildlife, or habitat, or
 - b. Was made in violation of any applicable regulation or ordinance, other than this section;

The Stormwater Administrator shall designate the time within which the connection shall be removed. In setting the time limit for compliance, the Stormwater Administrator shall take into consideration:

- a. The quantity and complexity of the work,
- b. The consequences of delay,
- c. The potential harm to the environment, to the public health, and to public and private property, and

d. The cost of remedying the damage.

(D) Spills. Spills or leaks of prohibited substances released, discharged to, or having the potential to be released or discharged to the stormwater conveyance system, shall be contained, controlled, collected, and properly disposed. All affected areas shall be restored to their preexisting condition.

Persons in control of the prohibited substances immediately prior to their release or discharge, and persons owning the property on which the substances were released or discharged, shall immediately notify the Fire Chief and the Stormwater Administrator of the release or discharge, as well as making any required notifications under state and federal law. Notification shall not relieve any person of any expenses related to the restoration, loss, damage, or any other liability which may be incurred as a result of said spill or leak, nor shall such notification relieve any person from other liability which may be imposed by State or other law.

(E) Nuisance. Illicit discharges and illicit connections which exist within the Town of Navassa limits are hereby found, deemed, and declared to be dangerous or prejudiced to the public health or public safety and are found, deemed, and declared to be public nuisances. Such public nuisances shall be abated in accordance with the procedures set forth by the Town of Navassa.

Secs. 1-97--1-106. Reserved.
